# New energy storage power generation in the Netherlands

## Overview

---

Will RWE build a battery energy storage system in the Netherlands?

Utility and IPP RWE will build a 7.5MW/11MWh battery energy storage system (BESS) in the Netherlands with grid-forming inertia capabilities.

Where is the Netherlands' largest stand-alone battery energy storage system located?

Dispatch, a Dutch battery developer, is going to construct the Netherlands' largest stand-alone Battery Energy Storage System (BESS) in the port area of Dordrecht. The system will be used for grid stabilization by storing excess energy from renewable sources. The battery, consisting of 144 Fluence cubes will be located on a 6000m<sup>2</sup> site.

How much energy storage does the Netherlands need?

To achieve its renewable energy targets, reports in 2021 indicate that the Netherlands will need to install between 29 and 54 gigawatts (GW) of energy storage capacity by 2050. Storage with efficient management systems and digital controls is a crucial element of a reliable, flexible and affordable energy system.

Why is RWE activating its first battery in the Netherlands?

Nikolaus Valerius, CEO of RWE Generation, commented: "The activation of RWE's first battery in the Netherlands here at Eemshaven represents a significant milestone in our ongoing commitment to strengthening the country's energy infrastructure while expanding our green energy storage portfolio.
