New removable power box

Overview

What is the difference between a portable power bank and a power box?

Portable power banks are smaller and more compact devices that are often used to charge small devices, like mobile phones. On the other hand, portable power boxes are heavier systems that are capable of powering a wide range of appliances. REDARC recommends that our products are installed by a qualified auto electrician or technician.

Are portable power stations a good choice?

Portable power stations are super versatile as they can be used to power a wide variety of appliances. They are also clean, quiet and environmentally friendly systems, perfect for all your adventuring needs. However, some portable battery packs can be heavy and have limited capacity, depending on the particular one you choose.

How do I increase the lifespan of my portable power station?

To increase the lifespan of your portable power station, we recommend not overcharging and keeping it constantly plugged in. This will only reduce its lifespan and cause damage to internal parts. Instead, charge your batteries to 80-90% capacity, then unplug from the power.
