# New solar energy system quotation in Ethiopia

## Overview

---

Does Ethiopia have solar power?

According to the researches, Ethiopia is blessed with an abundance of sunlight, receiving an average of 5.5 to 6.5 kWh/m<sup>2</sup>/day throughout the year. This vast solar potential, coupled with declining costs of solar technology, provides a significant opportunity for the country to harness clean energy.

Is Ethiopia planning a solar power plant near Addis Ababa?

Ethiopia's state-owned electric power company is planning to develop a 100 MW Solar PV power plant near the town of Metahara, 200 km east of the capital Addis Ababa. The project is supported by Power Africa, a U.S. Government-led partnership to promote new generation and increase access to electricity in Africa.

Can solar power transform Ethiopia's energy landscape?

Among these, solar energy emerges as a beacon of hope, poised to transform Ethiopia's energy landscape and drive socioeconomic development. Significantly, the country has relied heavily on hydropower, which accounts for more than 90% of its electricity generation.

Is there a private investment in solar power plants in Ethiopia?

However, there was no private investment in solar power plants in Ethiopia. Mainly the Ethiopian Electric Power Corporation (EEPCo) has been a state-owned and vertically integrated monopoly that controls the market from generation to selling of electricity throughout the country .
