# **Niger solar Power Station Component Project**

## Overview

---

Who financed a solar power plant in Niger?

The European Union, the French Development Bank and the government of Niger co-financed the installation. A French consortium made up of Akouo and Sagecom has finished building a 30 MW solar power plant in Gorou Banda, Niger. The Niger government had initially planned the project to have a capacity of 50 MW.

Where is solar energy used in Niger?

Solar energy is well-suited for use in Niamey and Zinder, located at lower latitudes, as they show less variability in solar radiation throughout the year. Niger has a long history of solar energy use, which began in the mid-1960s with the establishment of the Centre National d'Énergie Solaire (National Solar Energy Centre; CNES).

Are there any off-grid solar energy systems in Niger?

Yes, there is considerable experience of off-grid solar energy systems in Niger. These include off-grid PV electrification, water pumping, and solar water heating systems. The main decentralised renewable energy system promoted in Niger for rural electricity is solar PV.

What are the power generation stations in Nigeria?

Below is a list of the power generation stations in Nigeria: 1. Kainji power station reservoir. Kainji power station is hydro-electric powered. It has an installed generating capacity of 760MW. It was completed by 1968 and is located at Niger state. 2. Jebba hydro power station reservoir Jebba power station is hydro-electric powered.

## Niger solar Power Station Component Project
