# North Africa solar container lithium battery energy storage project

## Overview

---

Are energy storage boom times extending to Africa?

Boom times for energy storage have extended to the continent of Africa, with a 10-fold increase in installed storage supporting grids and renewable energy penetration.

How many storage projects are under development in Africa?

In total, AFSIA says around 18GWh of storage projects are under development across Africa. Tristan is an Electrical Engineer with experience in consulting and public sector works in plant procurement. He has previously been Managing Editor and Founding Editor of tech and other publications in Australia.

Which large-scale projects are launching a new generation of solar power?

Large-scale projects are continuing the trend, with those announced or starting construction including the second phase of the Soma Project in The Gambia with 100 MW/130 MWh, and the 900 MW PV/720 MWh storage project in Egypt developed by Masdar and Infinity Power.

How many MWh is installed in Africa in 2024?

In 2024, an estimated 1,500 MWh was installed across African nations. Accounting for more than half of this figure alone was the Kenhardt 1-2-3 project by Norwegian renewables developer Scatec, a solar-plus-storage plant successfully commissioned in 2024.
