Off-grid cost of Australian collapsible containers

Overview

How much does an off-grid solar system cost?

However, off-grid solar systems are generally more expensive than grid-tied systems. How much does an off-grid solar system cost in 2025?

According to our Energy Matters team, the average cost of an off-grid solar system for a two-to three-person home is around \$25,000—\$35,000. The greatest expense is the battery.

Is an off-grid Solar System worth it in Australia?

If you are looking for a way to reduce your reliance on the grid, save money on your electricity bills, and contribute to a cleaner environment, then an off-grid solar system may be a good option for you. Overall, whether or not an off-grid solar system is worth it in Australia depends on your individual circumstances.

What is a containerised Offgrid system?

Power where the grid can't go — delivered in a single, rugged container. MyEnergy designs and builds turnkey off-grid systems inside 10-, 20- or 40-foot containers, pre-wired, factory-tested and ready to run the moment they land on site. What is a containerised off-grid system?

Can you live off-grid in Australia?

Off-grid living in Australia presents unique opportunities and challenges. The continent's vast landscapes offer incredible potential for self-sufficient living, but the initial investment and ongoing costs can vary dramatically depending on your location, lifestyle expectations, and system choices.
