

# Off-grid cost of Southeast Asian energy storage container

## Overview

---

This enables 20-foot containerized systems storing 500-800kWh to operate at \$0.18-\$0.25/kWh – now cheaper than diesel generators in most regions requiring fuel transportation. Can storage support 100% renewable electricity futures in Southeast Asia?

This study is the first to explore the benefits of utilising STORES as a primary storage medium to support 100% renewable electricity futures in Southeast Asia. STORES can facilitate high penetration of variable solar and wind energy in electricity systems through energy time shifting and load levelling.

How long does energy storage last in Southeast Asia?

Within all the scenarios, the duration of storage is in the range of 0–38 h, which means hours or days of short-term energy storage are required in Southeast Asia rather than weeks or months of long-term, seasonal energy storage.

Which country has the most policy driven battery storage market in Southeast Asia?

The Philippines has become the most policy driven battery storage market in Southeast Asia. Through Green Energy Auction Program (GEA) 4, the Department of Energy has integrated storage as a mandatory element of large-scale renewable tenders. This decision has created a multi gigawatt pipeline of projects that have a clear commercial path.

Does short-term off-River energy storage support 100% renewable electricity in Southeast Asia?

Rapid increases in electricity consumption in Southeast Asia caused by rising living standards and population raise concerns about energy security, affordability and environmental sustainability. In this study, the role of short-term off-river energy storage (STORES) in supporting 100% renewable electricity in Southeast Asia is investigated.
