# One project energy storage

## Overview

---

What is Tesla's first energy storage facility outside the US?

As Tesla's first energy storage facility outside the US, it represents a \$201.76M investment and a milestone in China. Adjacent to the Gigafactory Shanghai, which produces over 950,000 EVs annually, the Megafactory will be a key export hub. Megapack is a powerful battery.

How much money does a Megapack energy storage project cost?

Covering about 200,000 square meters, the new energy storage project involved a total investment of 1.45 billion yuan (\$200 million). Up to 10,000 Megapack storage units are scheduled to be produced there annually.

Does Tesla have energy storage?

Tesla's deep involvement in the energy storage industry now rivals its electric vehicles in importance, Tao said, adding that its energy storage products are currently used in over 60 countries and regions. The U.S. company already has a factory for its Megapacks in California, which has an annual capacity of 10,000 units.

Will a Megapack be used for energy storage in a data center?

Gong Wei, vice president of Lingang Group, said the Megapacks would be used for energy storage in a data center in the Lin-gang Special Area, as part of its efforts to achieve carbon peaking and carbon neutrality.
