Overview

Can solar panels be installed on green rooftops in Norway?

Norway-based PV system provider Over Easy has deployed two vertical solar arrays on green rooftops in Norway. The company deployed a 102 kW installation covering 1200 m² on a flat-roofed commercial building in Oslo. It also supplied a 45 kW system for a school rooftop project earlier in the year.

What is the cost-benefit analysis for Bess & rooftop PV combined?

The cost-benefit analysis has been carried out based on the following primary benefits to C&I consumers considering BESS and rooftop PV combined and BESS without a PV system. The PV and BESS will operate behind the meter in tandem with the grid power supply system and DG power supply when there is a grid outage.

Who installed a 5 kW solar system in Oslo?

The installations were installed by Solenergi Fusen, an 11-year-old Norwegian project company specializing in commercial rooftop and building-integrated PV. The projects follow an earlier 5 kW pilot project, also located in Oslo. Over Easy has a novel, low-height, all-in-one system design for flat rooftops.

What is a glass-glass solar system?

The system's glass-glass modules are made with 3.2 mm solar glass and claim up to 95% bifaciality with an operating temperature range of -40 C to 85 C. The company's first green roof pilot was installed at an Oslo school.
