Outdoor large capacity energy storage solar container lithium battery pack

Overview

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What is a populated 20ft NWI liquid-cooling energy storage container?

*Specification of Battery Rack The populated 20ft NWI liquid-cooling energy storage container is an integrated high energy density system, which consists of battery rack system (280Ah LFP cell), BMS (battery management system), FSS (fire suppression system), thermal management system and auxiliary distribution system.

How does a lithium battery energy storage system work?

When the power grid is out of power, the lithium battery energy storage system can act as an independent inverter power supply to provide AC power to important loads, thereby ensuring the needs of users. In areas with high electricity costs, it is also possible to build a large energy storage system solely to sell electricity.
