

# Pakistan solar Glass Industry

## Overview

---

What is solar energy in Pakistan?

Solar energy is the heat and radiant light from the sun that can be harnessed with technologies such as solar power (used to generate electricity) and solar thermal energy (used for applications such as water heating). The Pakistani solar energy market is segmented by end users (residential, commercial, and utility).

How many solar projects are there in Pakistan?

According to the Private Power and Infrastructure Board of the Ministry of Energy, seven 530-megawatt solar projects are operational and supplying electricity to the national grid. Pakistan's renewable energy mix consists of solar, wind, hydroelectricity, and bioenergy.

Why is solar energy rising in Pakistan?

The rapid rise of solar energy in Pakistan is a direct response to the country's ongoing energy crisis and the broader global shift toward renewable energy. According to InfoLink's data, Pakistan's solar module demand reached approximately 3.5 GW in 2023 and is expected to rise to between 6.5 and 8 GW by 2024.

Why is Pakistan becoming a big solar market?

Pakistan, home to more than 240 million people, is experiencing one of the most rapid solar revolutions on the planet, even as it grapples with poverty and economic instability. The country has become a huge new market for solar as super-cheap Chinese solar panels flood in.
