What do you do with a portable power station?

To relax, he loves experimenting with new recipes, tweaking his smart home setup, and spending time outdoors on his bike or camping. Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more?

LiFePo4 power stations will last for more than 3,000 charge cycles, or about 10 years.

Can a portable power station be recharged using solar panels?

Portable power stations come in a broad range of sizes, from smaller models capable of charging a few devices to high-capacity backup units to keep your lighting and critical appliances on during a days-long blackout. And, many can be recharged using solar panels.

Do portable power stations have a weather rating?

However, other portable power stations do not have a weather rating, so it's important to check if you plan on using your power station outdoors. Regardless, it's a good idea to protect your power station from any water or severe weather conditions as much as possible.
