

Power company base station wind power generation

Overview

Where is China's largest onshore wind power base?

SHENZHEN, Dec. 10 (Xinhua) -- A wind power facility with an electricity generating capacity of more than 10 billion kilowatt-hours (kWh) a year was put into full-capacity production and connected to the grid in north China's Inner Mongolia Autonomous Region on Sunday, and is the country's largest onshore wind power base currently in operation.

Do wind-based power stations reduce energy imports?

More specifically, the operation of wind-based power stations first of all reduces the energy imports (oil, natural gas, coal, etc.) for almost all energy-importing industrialized countries contributing to annual exchange loss reduction.

How many kW of solar power will be installed at the base?

The clean energy projects at the base are planned to have an installed capacity of 6 million kW, which includes 4.5 million kW of wind power and 1.5 million kW of solar power. Construction of the supporting energy storage facilities is also included.

Where is China's first wind-solar power project located?

The 1 million-kilowatt wind-solar power project in Qingyang, Northwest China's Gansu Province, started operation as the first 4.05-megawatt wind turbine began to run on Dec 21. It was the first project to begin service at the Huaneng Longdong Energy Base, the country's first 10-million-kW multi-energy complementary comprehensive energy base.
