Practical small appliances with solar container outdoor power

Overview

Why should you use solar for appliances?

Here are a few reasons why everyone should consider using solar for appliances. Solar power is a sustainable solution that does not impact the environment adversely. With solar power helping your appliances run, you do not have to bother about power cuts. When several people use solar power, the pressure on electric grids decreases.

Does a refrigerator use solar power?

Refrigerator Refrigerators generally remain functional 24X7. On average, they consume around 1.5 kWh of energy every day. Therefore, to make your home energy efficient and reduce the electric bills, running the refrigerator using solar power can be a smart idea.

How many solar panels do I Need?

The number of panels you need to install for your home appliances depends on usage requirements. The number of appliances to be attached to the solar panels and their consumption capacities can be critical here. A household with 1 solar power AC will require a lesser number of panels than a home with 4 ACs.

How much solar power does a dishwasher use?

Dishwashers typically use 1.2-2.4 kWh of energy. Any good quality solar panel generates enough power to support these appliances effortlessly. However, the size of the dishwasher can be a factor determining its power requirement. If you have a large one, more solar power would be required.
