Price of 1 solar panel in Brno Czech Republic

Overview

The current price of panels is around 0.11 euros per one watt of output. However, it is possible that their production in Asia will slow down this year, and the price could rise to 0.13 euros. How much does solar energy cost in Czech Republic?

In the Czech Republic, the average annual energy yield for solar photovoltaic (PV) systems is approximately 1,000 to 1,200 kWh per kWp installed. ² As of June 2024, the average cost of electricity for households in the Czech Republic is approximately \$0.36 USD per kilowatt-hour (kWh). ³

Are photovoltaic power plants available in the Czech Republic?

In the Czech Republic, the availability of photovoltaic power plants for households has never been better. According to pwXchange, the wholesale price of solar panels has halved since December 2022. Those who install a typical rooftop power plant can now save up to a hundred thousand crowns compared to the previous year.

How much sunlight does the Czech Republic get a year?

The Czech Republic receives an average of about 1,670 hours of sunshine per year. ¹ In the Czech Republic, the average annual energy yield for solar photovoltaic (PV) systems is approximately 1,000 to 1,200 kWh per kWp installed. ²

How reliable is the power supply in the Czech Republic?

The electrical power supply in the Czech Republic is generally reliable. The country maintains a high standard of reliability, with the Loss of Load Expectation (LOLE) indicator set at a maximum of 15 hours per year. This means that, on average, the total duration of power outages should not exceed 15 hours annually. ⁴
