

Procurement of 120-foot folding containers for chemical plants

Overview

What is chemical procurement?

Link copied! Chemical procurement encompasses the processes and strategies involved in acquiring chemical products, primarily raw materials and ingredients necessary for manufacturing finished goods. This practice is critical across various industries, including pharmaceuticals, cosmetics, food and beverages, plastics, and petrochemicals.

What are intermediate bulk containers & drums?

In the dynamic landscape of the chemical industry, efficient storage solutions play a pivotal role in ensuring seamless operations and optimal safety standards. Among the myriad options available, Intermediate Bulk Containers (IBCs) and drums have emerged as frontrunners, revolutionizing the way chemicals are stored, handled, and transported.

What is a goodpack intermediate bulk container (IBC)?

Managing the safe transport and storage of chemicals is a major challenge for businesses. It requires solutions that not only ensure safety and compliance with regulations but also align with sustainability and cost-efficiency goals. Goodpack's Intermediate Bulk Containers (IBCs) provide an innovative, sustainable approach to meet these demands.

Does chemical packaging meet UN shipping requirements?

Sourcing chemical packaging that meets UN shipping requirements is a must for the industrial chemical industry. Combining those requirements with a need to transport economically can prove all the more challenging. Pipeline works with customers to invest in the right UN-approved chemical packaging for their products.
