

# **Professional customized solar container lithium battery for medical tools**

## Overview

---

What can a custom battery do?

Our custom batteries can also integrate a fuel gauge, date code, cycle information, and other functionality. Excell also builds an extensive array of different Nickel-Metal Hydride (NiMH) battery packs for medical applications that are more price-sensitive.

What is lithium ion battery?

Lithium ion battery of medical equipment produced by Large Power has complete safely protective circuit, equalization circuit and battery management unit (BMU). Lithium ion cells are connected in parallel and series strictly so that the battery pack has high consistency.

Who is Excell battery?

Excell Battery has in-depth experience and expertise in assisting OEM design engineers to choose the right battery chemistry for their battery-powered devices. We produce battery solutions based on a range of chemistries from Li-ion to NiMH and conventional lead-acid options.

Why do medical devices need a battery management system?

And more. Medical devices and equipment are critical to high-quality patient care and are designed to support battery energy sources for power backup, portability or mobility applications. As a result, the battery sources and management systems are vital components of any equipment for safe and reliable operation.
