Does El Salvador have a capacity to conduct renewable projects?

El Salvador has the national, political will to conduct renewable projects, as evidenced by the numerous incentives provided, the dire climate risks in the country, and their regional partnerships. While the institutional capacity is still catching up, to say they don't have any capacity would be false.

It has been noted that El Salvador's national policies have begun to fall in line with the United Nations 2030 Agenda for Sustainable Development. El Salvador's National Energy Council (CNE) develops their energy strategy, and has focused on energy efficiency and the promotion of renewable energy sources.

Should El Salvador prioritize renewables?

Prioritizing renewables is of utmost priority to El Salvador from an energy security basis, as they do not have any domestic oil, gas or coal supply and are dependent on imported fossil fuels from their partners.
