

# Quotation for a 2MW Photovoltaic Containerized Project for Oil Platforms

## Overview

---

The cost of setting up a 2 MW solar plant varies depending on location, component quality, and installation complexity. However, the average total project cost ranges from INR 8.5 crore to 10 crore. What is a 2 MW solar power plant?

A 2 MW (Megawatt) solar power plant generates approximately 8,000 units (kWh) per day under ideal sunlight conditions in India, or about 24,00,000–28,00,000 units per year, depending on location and system efficiency. These systems serve factories, IT parks, manufacturing units, and large institutions aiming to:

Should oil and gas companies integrate solar panels into their energy mix?

Across the globe, several oil and gas facilities have successfully integrated solar panel systems into their energy mix. These case studies highlight not just the feasibility but also the tangible benefits of such installations.

How much does a 2 MW solar plant cost?

The cost of setting up a 2 MW solar plant varies depending on location, component quality, and installation complexity. However, the average total project cost ranges from INR 8.5 crore to 10 crore. 9.54 Cr. (Approx.).

Can solar power be used in oil & gas facilities?

One major hurdle is the compatibility of solar systems with existing industrial infrastructure. Oil and gas facilities possess complex electrical and mechanical systems that were not initially designed to accommodate renewable energy installations. Environmental conditions pose another critical challenge.
