

# **Recent prices of solar energy storage in Kuwait**

## Overview

---

Lithium-ion battery prices in Kuwait City currently average \$280-\$320 per kWh, with complete storage solutions (including installation) costing \$450-\$600/kWh. Is Kuwait a good place to invest in solar energy?

Kuwait is in a great spot and has plenty of cash, but the country hasn't seen a surge in solar energy projects due to a lack of official support. As a result, this could dampen the market's expansion over the predicted time frame. The Kuwaiti solar energy market is partially consolidated.

How much solar energy does Kuwait use a day?

This situation is likely to lead to growth in the use of solar energy in the future. Kuwait's average solar intake is about 9-11 hours per day, with an average daily solar insolation that can reach more than 7.0 kWh/m<sup>2</sup>/day. The solar PV installation cost dropped significantly from USD 4,731 per kilowatt to USD 883 per kilowatt in 2021.

Will Kuwait develop 2 GW solar and wind projects in 2022?

February 2022: Kuwait announced that it planned to develop a 2 GW solar and wind projects, which the Kuwait Authority will tender for Partnership Projects.

### 1. INTRODUCTION.

How much does concentrated solar power cost?

While the installation cost of concentrated solar power was USD 8987 per kilowatt in 2010, it was projected to drop to USD 4700 per kilowatt by 2021. Solar photovoltaics are a better way to make energy than concentrated solar power because they are easier to use and need less maintenance.
