# Recommended sources of China-Africa industrial energy storage batteries

## Overview

---

Does China have a market advantage for battery storage systems?

ds, and service networks for battery storage systems. At present China does have some market advantages when it comes to the development of BESS infrastructure, including the supply chain related to global lithium-ion battery production.

How much battery material does China Import & Export?

China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons of battery materials, packs, and components, or 58% of interregional trade in 2023, according to regional UN Comtrade data.

Which country exports the most battery cells in the world?

China accounted for 74% of the world's battery pack and component exports in 2023. That same year, China controlled nearly 85% of the world's battery cell production capacity by monetary value. Data source: United Nations Statistics Division, UN Comtrade Note: Excludes trade within regions.

Where do battery minerals come from?

Battery mineral processing and processed battery minerals trade China processes over 90% of the world's graphite, and in 2022, Chinese companies accounted for over two-thirds of the world's cobalt and lithium processing capacity. China imported 20% of the world's processed battery minerals in 2023, made up of mainly cobalt from Africa.
