

# **Rome to add 376MWh of solar container lithium battery energy storage by 2025**

## Overview

---

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

Is battery storage a solution to energy security in Italy?

Italy's debate mirrors wider conversations across Europe. As countries integrate higher shares of renewables into their grids, battery storage is emerging not just as a backup solution but as a core enabler of energy flexibility and security.

Why are lithium-ion batteries used in space exploration?

Lithium-ion batteries play a crucial role in providing power for spacecraft and habitats during these extended missions . The energy density of lithium-ion batteries used in space exploration can exceed 200 Wh/kg, facilitating efficient energy storage for the demanding requirements of deep-space missions . 5.4. Grid energy storage.

Will Italy's energy storage consultation shape the future of grid-scale batteries?

Terna is calling on industry stakeholders, policymakers, and the public to provide feedback by June 13, 2025. This consultation represents an opportunity to help shape the future of Italy's energy landscape—not just for 2028, but for decades to come. Italy's energy storage consultation is shaping the future of grid-scale batteries.
