

# **Small water pump with oxygenation solar energy**

## Overview

---

What is a solar water pumping system?

A solar water pumping system is a technology that converts sunlight into electricity to pump water. The PV panels are then connected to a motor (DC or AC) which converts the electrical energy supplied by the PV panels into mechanical energy, which is then converted to hydraulic energy by the pump.

What are solar energy-powered water pumps?

Solar energy-powered water pumps are water pumps running on the electricity that is generated by solar energy. For generating solar power, solar photovoltaic (PV) systems are used for complementary energy sources, they are deployed alongside diesel pumps in areas with plenty of sunshine and where the cost to run power lines is high.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

How to use a solar water pump?

The Sunbell Solar Water Pump is ideal for a garden patio or pond. It comes in with a 3 m long cable and 4 different nozzle heads. It's very easy to use- just immerse the pump under water, place the panel under full sunlight and it will start automatically. Besides, the beautiful waterfall will give your garden a unique, special look.
