

# Sodium battery for energy storage power station

## Overview

---

Where is China's 10 MWh sodium-ion battery storage station located?

The 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China, China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, said on May 11.

Where is China Southern power grid deploying a 10 MWh sodium-ion battery?

China Southern Power Grid has deployed a 10 MWh sodium-ion battery in China's Guangxi Zhuang region. It is the first phase of a 100 MWh project. China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, has commissioned a 10 MWh sodium-ion battery storage station in Nanning, southwestern China.

Are sodium batteries the future of energy storage?

Continued growth in demand and emerging innovations in both molten sodium and sodium-ion battery technologies promise new opportunities for sodium batteries to advance global energy storage. Erik D. Spoerke.

What is energy storage sodium battery technology?

In the energy storage sodium battery technology, the sodium ion battery has better performance at high and low temperatures. The capacity retention rate is 70% at - 40°C, and it can be recycled at 80°C. At the level of energy storage system, the air conditioning power quota can be reduced, and there is room for cost reduction.
