

FTMRS SOLAR

# Solar 24W special battery

## Overview

---

Can I use a 24v battery in a solar panel?

A 24v battery is not available, so you'll have to connect two 12v batteries in a series connection in a battery bank. It's also very important that your solar panel's rating is not higher than that of charge controllers, so be sure to check your charge controllers list of specifications.

How much power does a solar panel store?

Unlike your ordinary solar panel that stops working on a cloudy day, it stores up to 75Wh power onboard to keep your camera running longer. The solar panel can be connected to two battery-powered cameras and charge them simultaneously.

Are solar panels good for ezviz battery cameras?

A perfect companion for the EZVIZ battery cameras that take care of larger areas, the solar panel helps greatly reduce human labor and energy bill. Actual charging efficiency may be slightly higher or lower depending on sunlight intensity and other environmental factors.

## Solar 24W special battery
