

# Solar Panels in Europe and America

## Overview

---

What is Europe solar PV market based on?

Based on mounting, the Europe Solar PV market is bifurcated into ground mounted and rooftop. The ground mounted segment is anticipated to grow more than 7% CAGR through 2034 due to improvements in technology pertaining to solar panels which increased their efficiency and durability, making system installations more cost effective.

Who are the top 5 solar companies in Europe?

The top 5 players in the industry include LONGi, Trina Solar, Jinko Solar, First Solar and Risen. The European solar market includes a mix of global players and strong regional companies. The leading firms range from solar module manufacturers to project developers, EPC contractors, and operators of solar assets.

How has the residential solar market changed in 2024?

Declines in residential solar markets have been a hit to the industry—but its foundation is strong. Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined.

Who dominated the global solar market in 2024?

In 2024, China once again dominated the global solar market, installing an impressive 329 GW, over six times the capacity added by the second-ranked United States, and exceeding the combined total of all other top 10 markets.
