

# **Solar curtain wall manufacturer for office buildings in New York USA**

## Overview

---

Who makes a curtain wall?

AmCraft Manufacturing Inc., founded in 2000, is an American manufacturer based in Elk Grove Village, Illinois, offering industrial, thermal, and acoustic curtain wall solutions. The company's curtain walls provide solutions for sound-dampening and sound-blocking enclosures, temperature zones, and isolation of work or storage spaces.

Are glass curtain walls energy efficient?

Glass curtain walls are energy efficient as they help natural light enter buildings. They use specially glazed glass, providing an esthetically pleasing exterior or interior for your office building. The use of natural light reduces the need for artificial lighting, making glass curtain walls an energy-saving solution for commercial buildings. Curtain walls have been used in commercial buildings for a long time, especially in New York City.

What is a curtain wall system?

A curtain wall system is a protective structure for a building's exterior. It consists of a grid in the facade, also known as the mullion, which determines how the glass fits into the wall. Glass curtain walls allow natural light into buildings, making them more energy efficient.

What is Mexico curtain wall system engineering?

Through collaboration with Mexico Curtain Wall System Engineering during the manufacturing process, the company delivers curtain walls engineered to withstand air and water infiltration, wind-induced sway, and seismic forces but also suit the aesthetic and geographic requirements of each building's structure.
