Solar industry front solar panels

Overview

What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.

How competitive is the global solar PV panels industry?

The global solar PV panels industry is competitive with key participants involved in R&D and constant innovation. It has become one of the most important factors for companies to perform in this industry.

Why is the solar panel market growing?

The solar panels market is experiencing significant growth due to increasing environmental concerns, government incentives, and declining costs of solar technology. The trend towards renewable energy sources, coupled with the need for energy independence, is driving the adoption of solar panels in both residential and commercial sectors.
