

Solar irrigation water pump in Lyon France

Overview

How are solar-powered irrigation pumps transforming European agriculture?

Solar-powered irrigation pumps are revolutionizing European agriculture by harnessing clean energy to deliver reliable, cost-effective water management solutions across the continent.

Which solar pumping systems work with my irrigation system?

If you already have an irrigation system in place, then the LORENTZ range of solar pumping systems can work with what you have. Drip, sprinkler, pivot or flood irrigation methods can be supported and integrate well to LORENTZ pumps. Our pumps can produce very high flows and high pressures, even offering features such as constant pressure and flow.

Which irrigation project is a candidate for solar?

With our solar pump systems you can consider any irrigation project a candidate for solar.

What is a solar water pumping system?

Solar water pumping systems are a perfect match for irrigation – a solar irrigation pump solution for remote locations where more sun increased the demand for water. LORENTZ solar pumping systems can be used to transform unused land into productive farms or to improve the yields from existing crops.
