What is an off grid solar power system?

On Grid Solar Power System Off grid solar power system doesn't connect to the power grid. In general, it includes solar panels, charger controller, batteries and inverter. This system will store the solar power into the batteries, batteries energy will be converted the electricity power to supply the appliances working through the inverter.

What is an off-grid solar inverter?

Off-grid solar inverters are such inverters that work efficiently without depending on the conventional utility grid. UTL's off-grid solar inverters don't require grid power to work.

What is the output voltage of grid off inverter?

The output voltage can be set between -40 % to +20 % of rated voltage. And the output voltage of grid off inverter is very accuracy $\pm 1\%$. Off grid solar power inverter often used in electric vehicle and train system. 200kW pure sine wave inverter without battery for solar power system, three phase, converts DC power to AC power.
