# Solar panel 5v charging module

## Overview

---

What is solar power manager 5V?

Solar Power Manager 5V is a small power and high-efficiency solar power management module designed for 5V solar panel. It features as MPPT (Maximum Power Point Tracking) function, maximizing the efficiency of the solar panel. The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel.

Which solar power management module for 12V lead-acid batteries?

Medium power solar management module for 12V lead-acid batteries. Solar Power Manager 5V is a small power and high-efficiency solar power management module designed for 5V solar panel. It features as MPPT (Maximum Power Point Tracking) function, maximizing the efficiency of the solar panel.

What is a solar power management module?

A micro power solar power management module for low-power sensors and controllers. Medium power solar management module for 12V lead-acid batteries. Solar Power Manager 5V is a small power and high-efficiency solar power management module designed for 5V solar panel.

How many Ma can a solar power module provide?

The module can provide up to 900mA charging current to 3.7V Li battery with USB charger or solar panel. The ON/OFF controllable DC-DC converters with 5V 1A output satisfies the needs of various solar power projects and low-power applications. Specifications The schematics has 5 sections,
