

Solar panel cooperation

Overview

Is cooperation between Chinese and European solar industry a 'win-win' situation?

Cooperation between Chinese and European solar industries is a "win-win" situation, said experts and business representatives from the photovoltaic (PV) industry during the recently concluded Intersolar Europe exhibition, the largest and most influential PV industry event in Europe.

What are solar panels & how do they work?

Besides inverters and energy storage systems, solar panels are a main component of PV products and comprise numerous solar cell units, the core component converting light energy into electricity.

Will China & Portugal collaborate on solar energy?

Pedro Amaral Jorge, president of the Portuguese Renewable Energy Association, highlighted the growing cooperation between China and Portugal in the solar energy sector, as Portugal aims to install approximately 8 gigawatts (GW) of solar power by 2026 or 2027 and reach 22 GW by 2030.

How can the European Union and China cooperate?

One of the most promising areas for deepened cooperation between the European Union and China is green technologies. The EU has long been at the forefront of innovation in clean energy — pioneering developments in wind power, solar energy, and electric vehicles.
