Solar panels installed on rooftops in Paris

Overview

Is France a good country for rooftop solar?

France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. France's photovoltaic (PV) policies are developed within the National Low Carbon Strategy and the Energy Programme Decree.

How many solar panel installers are there in France?

There are 721 installers based in France, which are listed below, in this article about French solar panel installers.

How much does it cost to install solar panels in France?

However, as a rule of thumb, the French energy management agency 'ADEME' considers the cost to be €3,000 to €4,500 per kilowatt of power created. As most domestic installations generate around 3k/W of power, this means the cost of the panels themselves is €9,000 to €13,000. For 6 k/W of power expect to pay €16,000 to €19,000.

Why is solar PV mandatory in France?

Mandatory solar: Solar PV is mandatory for living roofs for commercial and industrial buildings or covered car parks occupying 500 m² or more of ground surface. **Power to the people:** France's current policy framework is supportive of collective self-consumption and energy communities, with flexible regulations supporting prosumers.
