Solar panels on rural roofs in Denmark

Overview

How do we use solar energy in Denmark?

Today, we use solar energy in Denmark in two ways: in the form of rooftop solar panels that can produce heat and district heating, and solar cells that can produce electricity. Why is solar energy important?

Will Denmark have more solar cells?

Today, researchers are working on setting up more solar cells in Denmark and finding the right combination with other renewable energy sources while using the energy smartly. According to the Danish Energy Agency's 2020 Baseline Projection (danish only), solar cells will account for around 15% of Denmark's electricity production by 2030.

Why is solar heating important in Denmark?

Solar heating covers approx. 2% of Denmark's district heating production. One of the big challenges of solar heating is energy storage, because the sun provides the most energy in the summer, when we need it the least to heat buildings. Heat storage is therefore a major research area at DTU.

How many solar heating plants are there in Denmark?

At the end of 2017, there were 296 solar heating plants (solar heating plants with solar panel areas over 500 square metres) in operation worldwide, 111 of which were located in Denmark. Read also: Denmark at global front within solar heating. Solar heating covers approx. 2% of Denmark's district heating production.

Solar panels on rural roofs in Denmark

Denmark Launches New Rooftop Solar ...

Feb 5, 2025 · The Danish Energy Agency, or Energistyrelsen, has introduced a new virtual map to explore the potential of rooftop solar in order to ...

Solar to power Denmark's largest energy community

May 29, 2025 · Denmark's largest energy community is now under construction, featuring more than 30,000 sqm of solar rooftops with a total capacity of about 4 MW. The project will use ...

Denmark Solar Energy: New Strategy for Market-Driven ...

May 21, 2024 · The profitability of installing solar panels continues to fuel this market-driven expansion, making it easier for businesses and individuals to invest in solar energy in Denmark.

Solar Panel Systems in Denmark and Their Benefits

Grid stability: With proper integration, solar systems can contribute to a more stable and resilient energy grid. Economic benefits: The solar industry creates jobs and stimulates local ...

Solar to power Denmark's largest energy ...

May 29, 2025 · Denmark's largest energy community is now under construction, featuring more than 30,000 sqm of solar rooftops with a total ...

Solar energy

The annual solar radiation on Denmark's land is about 180 times greater than Denmark's total annual energy consumption. This makes the sun an ...

Denmark Launches New Rooftop Solar Potential Assessment ...

Feb 5, 2025 · The Danish Energy Agency, or Energistyrelsen, has introduced a new virtual map to explore the potential of rooftop solar in order to encourage its adoption among building owners ...

Denmark Solar Energy: New Strategy for ...

May 21, 2024 · The profitability of installing solar panels continues to fuel this market-driven expansion, making it easier for businesses and individuals ...

Solar energy

The annual solar radiation on Denmark's land is about 180 times greater than Denmark's total annual energy consumption. This makes the sun an enormous source of energy, and DTU ...

Solar Panel Systems in Denmark and Their ...

Grid stability: With proper integration, solar systems can contribute to a more stable and resilient energy grid. Economic benefits: The solar industry ...

Nrep

Denmark's first grid connected rooftop solar system Project Sun is a 6.9 MW grid connected solar PV system on the roof areas of 5 logistics properties ...

Denmark Tests Vertical Solar Panels on Farmland

Sep 16, 2025 · In Denmark, the debate over placing solar panels on farmland has often sparked heated discussions. As the country pushes to expand green energy, vast areas of agricultural ...

Danish government issues new strategy on solar power

Jul 2, 2024 · The government has raised five focus areas being 1) fast tracking the green transition, 2) Solar panels in the countryside, 3) Solar panels on roofs, 4) Solar panels on ...

Photo Voltaic on Green Roofs - the Scandinavian Way

Dec 19, 2022 · However, solar panels are rarely combined with green roofs, which of course would be beneficial with the many synergies that have been established. In Denmark, the ...

Photo Voltaic on Green Roofs - the Scandinavian Way

Dec 19, 2022 · However, solar panels are rarely combined with green roofs, which of course would be beneficial with the ...

Denmark's Largest Energy Community

Aug 8, 2025 · Denmark's largest energy community is currently under construction in Copenhagen's new district, Fælledby. The project includes more than 30,000 m² of solar ...

Nrep

Denmark's first grid connected rooftop solar system Project Sun is a 6.9 MW grid connected solar PV system on the roof areas of 5 logistics properties in Denmark.
