

# Solar panels on the roof of self-built villas

## Overview

---

What is a rooftop solar system?

A rooftop solar system consists of solar photovoltaic (PV) panels mounted on the roof of a building. These panels absorb sunlight and convert it into electricity, reducing or even eliminating your dependence on traditional power sources.

How does a rooftop solar system work?

Once permits are in place, the actual Rooftop Solar Installation begins. Mounting structures are fixed to the roof, solar panels are installed, and all components are connected. Wiring is done carefully, ensuring safety and reliability, and then the system is connected to your home's electrical panel.

Should you install solar power on your rooftop?

As the demand for clean and renewable energy grows, Rooftop Solar Installation has become a popular choice for homeowners and businesses. Whether you're looking to cut electricity bills, reduce your carbon footprint, or become energy independent, a solar power system on your rooftop can help you achieve those goals.

Can solar panels be installed on a roof?

Yes, solar panels can be installed on most roof types, including asphalt, metal and tile. However, the installation method may vary. 2.
