Solar power station in China in Jakarta

Overview

JAKARTA -- A groundbreaking ceremony for a 60-MW floating solar power project in Indonesia undertaken by China Gezhouba Group Co Ltd under China Energy Engineering Group Co Ltd was held on Thursday, marking the commencement of construction of a green energy initiative expected to generate approximately 129 million kWh of electricity annually. Will China win a photovoltaic power station project in Indonesia?

This is the first overseas photovoltaic power station project of CHN Energy, and it is also the first time that a Chinese-funded enterprise has won the bid for a centralized photovoltaic IPP (independent power generation company) project in Indonesia.

Is China building a floating PV power plant in Indonesia?

POWERCHINA recently completed the installation of photovoltaic (PV) components for the Cirata Floating PV Power Plant in Indonesia, marking the start of the final debugging and grid connection phase. The plant is the largest floating PV power plant in Southeast Asia and the first of its kind to be built by a Chinese company in Indonesia.

What are the key projects undertaken by powerchina in Indonesia?

The Jatigede Dam Project is one of the key economic and trade cooperation projects between China and Indonesia. Cirata Photovoltaic Project is the first floating photovoltaic in Indonesia, and also the largest one in Southeast Asia. Key projects undertaken by POWERCHINA in Indonesia: 1. Jakarta-Bandung High-Speed Railway Project.

Which country has completed The Cirata Floating photovoltaic power plant?

PowerChina has completed the Cirata floating photovoltaic power plant, a pioneering project in Indonesia that now supplies a quarter of the country's renewable energy production.
