# Solar power storage in China in Slovakia

## Overview

---

How is energy storage developing in China?

However, China's energy storage is developing rapidly. The government requires that some new units must be equipped with energy storage systems. The concept of shared energy storage has been applied in China, which effectively promotes the development of energy storage. 4.3. Explore new models of energy storage development.

Should China consider energy storage in energy planning?

In the planning stage of the power system, the Chinese government should consider the safety, economic and social benefits of energy storage. Incorporate energy storage into energy planning to promote the commercial application of energy storage.

Can energy storage be commercialized in China?

The application of energy storage ultimately depends on market demand. The commercialization of energy storage in China should find its own profit point and clarify the application scenarios and business models of various energy storage, so as to achieve long-term development of the energy storage industry.

How can energy storage be profitable in China?

Actively support the diversified development of user-side energy storage. Encourage user-side energy storage such as electric vehicles and uninterruptible power supplies to participate in system peak and frequency regulation. Explore new energy storage models and new formats . Energy storage can be profitable with policy subsidies in China.

## Solar power storage in China in Slovakia
