Solar power system inverter

Overview

What is a solar inverter?

It is an inverter that offers very good solutions for decentralized solar plants with a complicated topology (e.g. “terraced” PV plants, mountain plants.); floating PV plants or agrivoltaic PV plants. They offer a high energy yield (over 98%) and are ideal for medium to large-scale plants.

Why do you need a solar inverter?

We believe that the world would be a better place if everybody had easy access to the cleanest energy from the roof of their homes and businesses. By creating simple, easy to use, affordable and reliable inverters we are revolutionizing access to solar power and delivering financial savings to your home or business.

How do inverters work in a rooftop solar system?

Inverters change the raw DC power into AC power so your lamp can use it to light up the room. Inverters are incredibly important pieces of equipment in a rooftop solar system. There are three options available: string inverters, microinverters, and power optimizers. Team up with an Energy Advisor to see which inverter is best for your solar project
