# **Solar-powered containers are being charged in both directions at the port of Avaru**

## Overview

---

Is solar energy a future for shipping and ports?

Similarly, shipping companies like Maersk Line have invested in solar power systems for vessel power, reducing their environmental impact and operating costs. Recent trends in the adoption of solar energy in sustainable shipping and ports indicate a promising future.

Why should ports use solar energy?

Lastly, solar energy provides increased energy independence and resilience. Ports and ships equipped with solar power systems have a more reliable and stable energy supply, ensuring uninterrupted operations. Solar energy can be seamlessly integrated into various aspects of port infrastructure.

How can solar energy improve port infrastructure?

Solar energy can be seamlessly integrated into various aspects of port infrastructure. Installing solar panels on rooftops and parking structures not only generates clean energy but also optimizes the use of available space. Furthermore, solar-powered lighting and navigation systems enhance safety and reduce energy consumption.

## Solar-powered containers are being charged in both directions at the same time
