

Solar powered house generator in Vancouver

Overview

How much does a solar generator cost?

A small solar-powered generator that produces 2.2kW of power will cost around \$2,500, including solar panels and a fast-charging system. We need to add the amount of (watt-hours) Wh to the range, as this will determine the length of time the unit will provide power before the batteries need to be recharged.

Which solar generator should I buy?

If your main priority while shopping for a solar generator is a big battery capacity, the Ecoflow Delta Pro Power Station with Solar Panel is the one to go with. It stores the most power, so you can keep things running for days. It's great to travel with, too.

How much does a backup solar generator cost?

If you need a backup solar generator to power a few small items, such as a laptop and a couple of lights, a 1,200-kW unit at around \$350 should suffice. If you need a little more power, a 3,500kW unit will cost around \$1,300.

How much does it cost to install a generator?

The average house will spend around \$25,000 on a permanent-type backup gas generator, including installation and an automatic switch-over system. A small solar-powered generator that produces 2.2kW of power will cost around \$2,500, including solar panels and a fast-charging system.
