Who are the best thin-film solar companies?

While formerly leading companies like Solar Frontier have moved away from the space, there are still many thin-film solar companies to watch in the coming years: Hanergy: Hanergy is one of the largest solar manufacturers in the world, and specializes in thin-film solar panels.

How are thin-film solar panels made?

Unlike traditional PV panels, which are exclusively made by using silicon wafers, thin-film solar panels are made through the use of different materials such as Amorphous silicon (a-Si), cadmium telluride (CdTe), gallium arsenide (GaAs) and copper indium gallium selenide (CIGS).

What materials are used in thin-film solar panels?

Here is a detailed look at the four main materials used in thin-film solar panels today: As the first commercially available thin-film solar cell, Amorphous Silicon (a-Si) strips have been used since the late 1970s.
