

# **Sudan energy storage equipment transformation**

## Overview

---

Can Sudan maximize its energy resources?

The analysis reveals promising indicators of Sudan's ability to maximize its solar, wind, and geothermal energy resources. It also presents conclusions and recommendations concerning the future of RE policies and production in Sudan.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

How many geothermal projects are planned in Sudan?

However, 54 MW of geothermal projects are planned by 2030. Additionally, Sudan's nuclear energy program targets two 600-MW reactors by 2030, while tidal energy projects could contribute 1.2 TWh annually to the grid. These initiatives aim to diversify Sudan's energy mix and enhance the country's sustainability.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

## Sudan energy storage equipment transformation
