

# Swedish Solar System

## Overview

---

### What is Sweden Solar System?

Coordinated by the Swedish Astronomical Society, Sweden Solar System aims to give people a feeling of the enormous distances in space, and how small the planets are compared with the Sun. Join GabrielTheGuide (YouTube) on a journey through Sweden Solar System from the Sun in Stockholm to Neptune in Söderhamn! Video: Gabriel Gumucio.

### What is the scale of the Sweden Solar System?

The scale of the Sweden Solar System is 1:20 million. This means that each meter in the model equals 20 million meters (or 20,000 km) in space. At this scale, the Sun is represented by the Avicii Arena (formerly known as the Ericsson Globe) in Stockholm, the second-largest spherical building in the world.

### How many planets are in the Sweden Solar System?

Originally conceived as the Stockholm Solar System with planets no further than Jupiter, the idea was soon taken up by schools, science institutions, and other organizations further afield. The Sweden Solar System currently consists of more than 60 objects distributed across 26 locations in Sweden.

### How are the planets represented in Sweden?

The planets are represented by various spherical objects and sculptures scattered across different cities and towns in Sweden. Mercury is a metal ball with a diameter of 25 centimeters located in the Stockholm City Museum.
