

FTMRS SOLAR

Taipei rechargeable solar container battery

Overview

The system uses high-safety lithium iron phosphate (LFP) batteries, offering a storage capacity of 14.3 kWh and a continuous output power of 10 kW. How energy storage system works in Taiwan?

The energy storage system can discharge power immediately to fill any power gaps, and its hour of duration provides enough time for all the natural gas units across Taiwan to start up and restore power. It is anticipated that similar energy storage facilities will be gradually established throughout Taiwan in the coming years.

What is Taiwan's largest energy storage system?

On June 30, 2022, the plant successfully connected to the grid, with a capacity of 20 megawatts (MW) and a total energy storage capacity of 20,000 kilowatt-hours (kWh). At the time, the achievement set the record for the largest energy storage system in Taiwan and was capable of providing one hour of electricity to 40,000 households.

Will Taipower install a 2MW energy storage system at Changgong wind farm?

Taipower plans to install a 2MW energy storage system at the Changgong Wind Farm and, in doing so, will rely heavily on the experience gained with energy storage implementation in the Tainan salt flats. This will ensure that the project is completed on schedule and at a high quality.

What is Taipower?

In conjunction with the government's promotion of solar power generation combined with energy storage system installations, Taipower aims to improve the resilience of its power system and increase the penetration of renewable energy.
