Taipei solar container communication station Super Capacitor Lightning Protection

Overview

What are the limitations of a conventional lightning protection system?

The IEC 62305 and respective local standards are practical guidelines when designing a conventional lightning protection system. However, there are limitations in a conventional lightning protection system; in that it has a limited reach to protect wide open spaces, and limited in its protection class.

Who is Mun Hean lightning protection?

The Mun Hean Lightning Protection team, with more than 200,000 project references in lightning protection, is arguably the most prolific lightning protection solutions provider in Asia.

What is a lightning protection standard?

They differ depending on region and field of application. The overarching standard is lightning protection standard IEC 62305. It describes protective measures against lightning events and an extensive risk analysis with regard to the necessity, scope, and cost-effectiveness of a protection concept.
