# Tariffs for Solar Systems

## Overview

---

How will tariffs affect solar manufacturing?

Tariffs increase prices and disrupt supply chains, and solar manufacturing isn't immune to these impacts. Despite the potential upside for domestic manufacturers, as the tariffs are enforced, the cost of going solar will increase for homeowners across the U.S.

Is the solar industry insulated from tariffs?

Although the cost to install solar in the United States is higher than elsewhere in the developed world, the industry continues to grow in the U.S. The good news is that there has been significant investment in solar manufacturing in the U.S., so the industry is somewhat insulated from the impact of tariffs.

How will Trump's new tariffs affect the solar industry?

The article below describes the tariffs announced on April 2, 2025. The Trump Administration's new sweeping tariffs could cause uncertainty for the solar industry, which relies heavily on imported goods. In our 2025 Solar Industry Survey, 56% of solar installation companies cited concern about potential tariffs, and these fears are being realized.

What are China's solar tariffs?

Additionally, a 145% tariff has been imposed on Chinese solar products. These measures are expected to disrupt the supply chain and increase costs for solar equipment across the board. The U.S. heavily relies on imported solar components, with Southeast Asia supplying over 80% of its solar panels. The new tariffs are anticipated to:
