Tehran Communications 5G base station is now available

Overview

Is Iran a good place to invest in 5G?

There has also been investment in 5G, though the development of this sector has been hampered by the paucity of available spectrum. To address this, the government planned imminently to release spectrum in the 3.7-3.8GHz range for 5G. From a broad perspective, Iran offers significant opportunities for growth in the telecoms sector.

Which telecom companies are in Iran?

Telecommunication Company of Iran (TCI), Mobile Communications Iran (MCI), MTN Irancell, Tamin Telecom (Rightel) Download the latest report on the Iran Telecom Industry. Iran aiming to cover 20 million premises with a fibre broadband service by end-2025.

Will Iran cover 10 million premises with a fibre broadband service?

Government aiming to cover ten million premises with a fibre broadband service by March 2024 and 20 million by end-2025. European Union sanctions Iran's telecom regulator for implementing laws on intercepting traffic carried by the country's telcos, and for filtering internet content through spyware.

How many 5G base stations will there be in 2024?

Regulator predicts that the number 5G base stations will increase to 1,200 by March 2024 and to about 4,000 by March 2025. Report update includes telcos' operating data to Q3 2023, updated Telecom Maturity Index charts and analyses, assessment of the global impact of the pandemic on the telecoms sector, recent market developments.
