## Overview

---

What is the economic outlook for 2025?

Citation: United Nations (2025). World Economic Situation and Prospects 2025. New York. Global economic growth is projected to remain at 2.8 per cent in 2025, unchanged from 2024, according to the United Nations flagship report, World Economic Situation and Prospects (WESP) 2025.

What policy priorities should be aligned with long-term development goals?

Aligning fiscal, monetary and industrial policies with long-term development goals. This report provides an assessment of global economic prospects for 2025. It highlights emerging risks – especially for vulnerable economies – and outlines key policy priorities to strengthen resilience in a fragile global economy.

How can a new development philosophy improve economic development?

To ensure sound economic work at the moment, it is crucial to adhere to the new development philosophy to continuously foster new growth drivers and new strengths in economic development. At sea, the country's second domestically built large cruise ship, the Adora Flora City, successfully completed its float-out.

What does UNDP's landscape of development mean for the future?

These opportunities offer pathways to better, fairer futures— if we choose to seize them. UNDP's Landscape of Development paper marks the first phase in shaping our Strategic Plan 2026-2029. It sheds light on the interconnected and rapidly evolving world we must navigate as we accelerate efforts toward the 2030 Agenda.
