# The largest single-cell solar container battery

## Overview

---

At the recently held 3rd EESA Energy Storage Exhibition, Envision Energy officially unveiled the world's largest energy storage system — the Standard 20-foot Single Container 8MWh+, marking the entry of the energy storage industry into the 8MWh era. Which energy storage companies have higher capacity cells?

Higher capacity cells were previously released by the likes of Envision (700 Ah featured in its industry-leading 8 MWh, 20-foot BESS container) and Lithium (1175 Ah featured in its latest 6.25MWh BESS with a four hour energy storage configuration).

How much energy does a 20 ft container system use?

The Chinese manufacturer said its next-gen 20-foot container system packs 40% more energy and has a 40% smaller footprint compared to a standard 5 MWh system. The new product is based on 587Ah battery cells, with an energy density of more than 430 Wh/L. The capacity of a single battery cell stands at 1.87 kWh.

How many large-capacity energy storage cells are there in China?

This year's exhibition saw participation from over 120 Chinese energy storage companies, which unveiled hundreds of new storage products and solutions. Among them were more than 20 large-capacity cells, covering capacities such as 392Ah, 472Ah, 587Ah, and 684Ah.

Are large-capacity storage cells reshaping the energy storage industry?

As the most significant technological advancement in the energy storage industry, large-capacity storage cells are rapidly reshaping every segment of the energy storage supply chain.
