**There is a battery energy storage project in Surabaya Indonesia**

## Overview

---

Why is battery energy storage system important in Indonesia?

However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing intermittency issue that hamper the development of solar and wind generation. Hence, the battery energy storage system (BESS) technologies have a critical role in the development of Indonesia's renewable energy.

Is battery storage taking off in Indonesia?

Despite the opportunities for manufacturing, from a deployment perspective, battery storage has not yet taken off in Indonesia beyond a handful of projects, including a 5MW pilot announced by the government in March 2022. Rept Battero has announced plans to develop an 8GWh gigafactory in Indonesia specialising in lithium-ion cells for BESS.

What is Indonesia's battery project?

This ambitious initiative aims to strengthen the country's battery supply chain and promote the adoption of sustainable energy. The project is designed to support Indonesia's 2060 carbon neutrality goals by establishing a green, circular industrial development model.

Who is involved in the battery energy storage system project?

Subsidiaries of PLN involved in the Battery Energy Storage System project happen to be the primary electricity providers in Indonesia, such as PT Indonesia Power, PT Pembangkitan Jawa Bali, and others. The plan to develop an energy storage system aligns with the positive growth in the renewable energy industry.

## There is a battery energy storage project in Surabaya Indonesia

---

Indonesia Surabaya holds an electrochemical energy storage project

Why is battery energy storage system important in Indonesia? However, given the challenge of Indonesia's geological landscape, with many off-grid and remote areas, there is growing ...
